# BARE FACE BEAUTY ACADEMY COURSES

Bare Face Beauty was one of the very first microblade brows training providers in the UK founded by Sarah Hesketh. We have many years of experience in microblade brow treatments and micro pigmentation training. Our primary training location is in the North West of England. We also have regular training in Kent and Northern Ireland in stunning purpose built locations.

We offer fully accredited and insured courses for beginners through to skills refinement and masterclass days for experienced therapists. All our training is in small groups so you get dedicated attention from experienced and qualified tutors. PLUS you get ongoing support after your training as micro pigmentation takes time to become proficient. We understand that you will need ongoing support and for this reason you have unlimited access to our support forum.

In addition all our courses include your training materials plus excellent kits which enable you to more than recoup your training fee. You are also provided with lunch and refreshments.

You can also spread the cost of training as finance is available on all our courses.

Bare Face Academy is also THE official UK trainer for SofTap® manual method of micro pigmentation which is the perfect progression for the microblading artist to learn PMU for the eyes, lips and areola.

**bareface**  
PMU ACADEMY

“Our training is not just a class, it is the start of a journey which we are with you all the way.”

# SOFTAP INC.

## Would you like to get in on the best kept secret in permanent beauty?

Often described as the best kept secret in permanent beauty SofTap® eyebrows, lips and eyeliner is the original hand method of permanent make up and is the most gentle way to apply permanent make up. SofTap® was the first company in the world to develop a manual method of implanting colour into the upper layers of the skin to create beautiful micro pigmentation. SofTaps globally patented needles are long, soft and flexible and gently allow (with their unique tapping technique) excellent deposit of SofTap® pigments into the skin.

Bare Face Academies are THE official SofTap® training course providers in the UK with fully accredited courses. The beauty of SofTap® technique is that it is a very natural progression for a microblading artist to advance into micro pigmentation for lips and eyeliner along with areola and medical tattooing. As a bonus students learn SofTap® technique as part of our Beginners' Microblading and Shading course, therefore learning two techniques in one course.

SofTap® Permanent Cosmetics is the brand name and trademark for SofTap® Inc. The permanent make up company offering the highest quality education, hypo-allergenic pigments and 100% disposable SofTap® hand tools to permanent cosmetic professionals.
